

Our unique technology

Magnetic therapy has been used as a complementary therapy for thousands of years. It is non-invasive and 100% natural.

The magnets developed by Bioflow® use a strong, multi-directional force of magnetism called Central Reverse Polarity®.

Standard magnets have single polarity (a North and a South pole) where as Central Reverse Polarity magnets have a unique arrangement of magnetic poles (North - South - North).

This technology is unique and patented to Bioflow®.

Bioflow products are credited as a Class 1 medical device in Europe.

Bioflow®

Our Bioflow® range is the result of extensive research. It is our understanding of magnet technology combined with a commitment to development that has positioned us as the leading manufacturer of magnotherapy products.

Reasons for choosing Bioflow® over other magnetic products include:

- We use only the highest quality neodymium material in our magnets. Neodymium magnets are the strongest type of permanent magnets known.
- Bioflow products feature Central Reverse Polarity technology. This technology is unique and patented to Bioflow®.
- We have thousands of letters from customers telling us what a difference Bioflow® has made to their lives and to date, over a million people have made the decision to use our products.

IMPORTANT

Bioflow® products should not be worn by anyone fitted with a heart pacemaker or other implant that could be affected by a strong magnetic field. There is no substitute for sound medical advice and we recommend that if you are concerned about a health issue, you should consult a doctor or medical professional.
